

SCALE UNIT

Heavy-Duty Scale Assembly is available in either powder coated or corrosion resistant stainless steel. The scale unit is designed to be gentle and safe for even small pigs.

LOAD CELL

Four precision load cells provide accurate animal weight.

INTEGRATED MANAGEMENT SYSTEM

The Weigh-Trax automatic sorting system is a component of the INTEGRA line of integrated management tools for today's professional producer. The INTEGRA system provides real time monitoring and control of animal weight, feed, water and environment from your home or office by utilizing your PC and Agnet software.

INTEGRA INTEGRATED MANAGEMENT SYSTEM **WEIGH-TRAX**

- **MINIMIZE SORT LOSS**
- **REDUCE LABOR COST**
- **MAXIMIZE FEED RATIONS**

SORT GATE

REAR GATES

ACTUATORS

Independent high-speed electric actuators control the sort gate and rear gates. These reliable and safe actuators eliminate the need for expensive compressors and air lines and greatly simplify retrofit applications.

INTEGRA WEIGH-TRAX CONTROLLER

The INTEGRA controller will simultaneously monitor and control up to four independent Weigh-Trax units providing convenience and savings. The controller can be mounted remotely in an office to simplify monitoring and programming and protect it from harsh barn environments. Each Weigh-Trax scale unit is equipped with a separate scale head to allow the producer to view animal weights while at the scale.
