| Bin 8 | 0 | 0 | | 3300 (7) | 01/04/2012 12:00 AM |

- Daily status reports and notifications including feed consumption, inventory, temperature and water
- Easy-to-read reports, graphs and historical data enable informed business decisions, improve efficiency and enhance animal welfare.

REMOTE MONITORING

An online dashboard provides access to real-time statistics as well as historical data to help you better evaluate and monitor vital facility operations.

FLEX-FLO™ XD AUGER

- Monitor feed levels, cumulative daily auger run times, cumulative water consumption, and current temperature from any web-enabled device.
- Provides email or text notifications of system parameters falling outside of predefined thresholds.

NETWORK MASTER SUPPORTS

- Up to 50 feed bin display units
- Up to 25 Smart IR II units
- Up to 8 temperature and water units
- 15 Pit Stick Monitoring Systems
- Automated Slide Gate – 50 Control Boards and 100 Slides
- Up to 16 different notification contacts
