

VENTILATION SYSTEMS OUTSIDE TUNNEL DOOR

Ventilate and Insulate

Outside tunnel doors are available for systems of any length with any number of vertical doors. Drive units can control single, double, or triple doors. A unique overlapping door design minimizes framing. Other features include 1.5" panels with R8 insulation rating and built-in UV protection. Choose white or black door panels.*

PROVEN & DEPENDABLE™

Complete Control

Efficient management and remote access with EDGE®

The versatile and intuitive EDGE® is a single platform that can handle all control applications. It is flexible enough to be adapted to new construction or existing system upgrades. The unique modular design makes EDGE a perfect choice to accommodate your operation's specific requirements. EDGE allows you to monitor temperature, static pressure, humidity, wind speed, wind direction, precipitation, lighting, ammonia and CO₂ sensors, inlet positions, current transformers, water meters, animal weights, feed usage and run time, alarms and more! There is no limit to what EDGE can do.

Plug in an Ethernet cable and you are ready to take control of the system from any web-enabled device. Monitor and analyze data in real-time or quickly respond to any issues. If a problem occurs and an alarm is triggered, you will be immediately notified via text message or email.
