

# ROLLSEAL<sup>®</sup>

CLIMATE CONTROL

UNLOCK BETTER PERFORMANCE

# KEEP THE COLD OUT, AND THE WARMTH IN

## **ROLLSEAL® SIDEWALL SYSTEM**

- Unbeatable seal and higher insulation rating compared to traditional curtains.
- Positive pressure systems. Helps control the amount of air entering and exiting a building in a positive pressure environment.
- Evaporative cooling systems. Designed to fit the Komfort Kooler™ Evaporative cooling system with a precision tight fit to limit air infiltration.
- Utilizes 2 dead air spaces for the best possible insulating seal and protects cooling pads from inclement weather, dust, UV rays and other harmful environmental elements.
- Manual and automated drive options are available to best suit your application.

## **ROLLSEAL® SHUTTERS**

- The 2-ply flexible shutter provides an excellent source of insulation with a positive seal for greater efficiency.
- The patented sealing system provides excellent wind load resistance.
