

# PIT STICK

PIT LEVEL MONITORING

UNLOCK BETTER PERFORMANCE

# REAL-TIME DATA **BETTER PLANNING**

The Pit Stick Monitoring System provides swine producers with real-time data to better visualize the amount of manure in the pit and know how much storage is left to help plan pumping schedules more efficiently.

## **INSIGHTFUL STORAGE USE**

Provides insights on how much pit storage is being used week-to-week and month-to-month.

## **SMART WATER DETECTION**

Detects excessive soaking and large water leaks.

## **AUTOMATIC MONITORING**

Can be operated as a stand-alone system or connected to the EDGE and EDGE 2 barn controller to provide automated updates and alerts about manure pit storage levels.

## **EASY INSTALL COMPONENTS**

The Pit Stick gives you an accurate and current reading of your pit level. The Pit Level Sensor has settings for both high and full level alarms.
